A New Platform for Multidisciplinary Engineering Research: Welcome to the *Journal of Multidisciplinary Engineering*

Aboalgasem Alakhdar[1]*

[1]Department of Geological Engineering, Faculty of Engineering, Nalut University, Jado, Libya.

The field of engineering continues to evolve rapidly with the advancement of technology, interdisciplinary collaboration, and the growing need for sustainable solutions to global challenges. Modern engineering research increasingly integrates knowledge from various disciplines, including civil engineering, industrial engineering, electrical engineering, mechanical engineering, environmental science, materials science, and computational technologies.

Recognizing the importance of providing a dedicated platform for the dissemination of high-quality research, we are pleased to introduce the *Journal of Multidisciplinary Engineering (JME)*. The journal aims to serve as an international forum for researchers, engineers, and academics to share innovative ideas, scientific findings, and technological developments across a broad range of engineering fields.

The scope of the journal includes, but is not limited to, civil engineering, structural analysis, geotechnical engineering, petroleum engineering, materials engineering, environmental engineering, renewable energy systems, transportation engineering, computational modeling, and emerging technologies in engineering applications. By encouraging interdisciplinary collaboration, the journal seeks to promote integrated solutions to complex engineering problems.

All submissions to the journal will undergo a rigorous peer-review process to ensure scientific integrity, originality, and high academic standards. The journal is committed to maintaining the highest ethical standards in scientific publishing, including authorship transparency, prevention of plagiarism, and disclosure of potential conflicts of interest.

The Journal of Multidisciplinary Engineering welcomes the submission of original research articles, review papers, technical reports, and case studies that contribute to the advancement of engineering knowledge and practice.

We look forward to visit our publisher and collaborating with researchers and professionals worldwide to advance engineering innovation and promote sustainable development through scientific research.
